DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishikawa et al. (5,838,671).

Regarding claims 1 and 12-13, Ishikawa discloses a method and apparatus for call admission control in CDMA mobile communication system, comprising a call admission check unit which determines whether to admit a call in response to reception of the call based on a threshold that reflect history of base station transmission power (see fig.2, element 115, 119, fig.3, steps S21, fig.7-8 and its description).

Regarding claims 2-3, 11, Ishikawa further discloses an averaging unit which obtains an average of past samples of the base station transmission power, wherein said call admission check unit determines whether to admit the call by comparing the threshold with a sum of the average of past samples and transmission power required for the call (see fig.3, steps S21-23 and its fig.8, and its description).

Allowable Subject Matter

3. Claims 4-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
